

# BATMAN: FRIENDS AND FOES

## Cocktail compilation by [superherococktails.com](http://superherococktails.com)

**Note about the juices used:** for blueberry, cherry and cranberry juice please use high quality concentrate (organic, if you will) diluted with water 1:1 ratio instead of recommendation (usually 1:3 or 1:4).

**Skittles tequila:** This will look hideous when you manufacture it, but it will taste great in cocktail!!! Pour Skittles into glass jar and cover them with gold or reposado tequila (no point in using your most valued bottle). Stir occasionally. After couple of hours, when candy looks like "yellow beans" (pictured) it's time to filter. It's essential to get rid of "yellow foam", otherwise it will emerge in cocktail. You might have to filter the broth twice. It's a bit arduous task, but worth it!

**Jelly bean tequila:** As above, but use jelly beans instead. It's best to avoid brown jelly beans ("cola flavour") in this one. They result in unsatisfactory "dirty brown" liquid, otherwise it's going to be orange. Yes, even a few blue ones among others will produce orange tequila!?

**Coffee rum:** Pour a brimful tablespoon of coffee grounds into 1 dl (3 1/2 oz) of white rum. Let it soak for 15 minutes, stirring occasionally. Filter.

**Licorice vodka:** Pour licorice into glass jar and cover them with vodka. Stir/shake occasionally. After two hours strain (no actual filtering needed). Please do not use licorice with filling, just plain black version. Some brands might need a little more time in vodka.
